

“Common Future Vision for the German-Polish Interaction Area - Horizon 2030”

The regional dimension - example of relations between Lower Silesia and Saxony

18th June 2019, 6.00 p.m.

Saxony Liaison Office Brussels

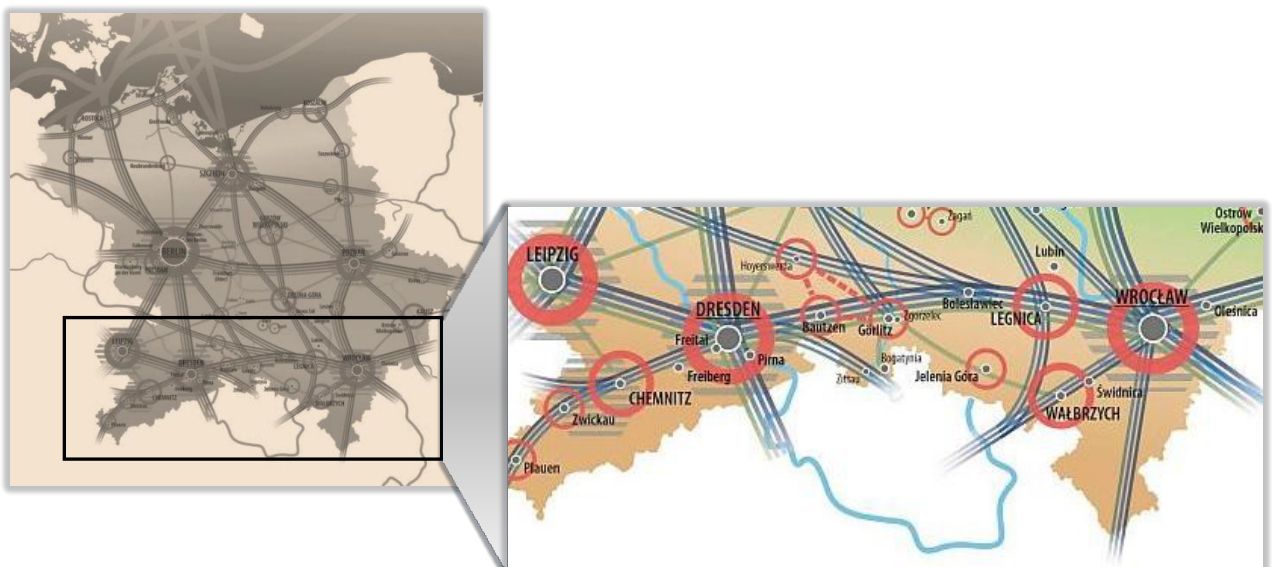

Avenue d'Auderghem 67
B-1040 Brussels

Deepening mutual relations by strengthening the socio-economic, transport, communication-based and administrative links is a necessary condition for achieving the strategic objective of a common area of growth in Europe.

Launched in December 2016 “Common Future Vision for the German-Polish Interaction Area - Horizon 2030” is a spatial planning vision for the area on both sides of the Oder and Lusatian Neisse rivers in 2030. The document has been prepared by the Spatial Development Committee of the German-Polish Governmental Commission for Regional and Cross-Border Cooperation and contributes to the implementation of the agreements on Good-Neighbourliness and Friendly Cooperation between Poland and Germany.

Implementing the Strategy requires an integrated approach and numerous activities conducted on different levels and backed by a great number of people and institutions. In this regard, the Common Future Vision 2030 indicates certain guidelines for development which focus on the areas of key importance for a future development of Polish-German borderland.

During the event, organized in the framework of the 20th anniversary of cooperation between the Lower Silesia Region and the Free State of Saxony, experts from both partner regions will discuss the role of bilateral partnership, as well as present joint initiatives that may contribute to deepening cross-border cooperation and creating an interaction area at the Polish-German border.
